

ViconNet Technical Training Course

Singapore, 24-25 March 2011

If you install or use ViconNet systems, you already know why ViconNet is considered the security industry's premier digital video management system. But are you making full use of all that this powerful platform has to offer? You can attend the full two-day's ViconNet Technical Training Course designed to provide you with a full appreciation of ViconNet's many features and components and teach you how to manipulate them to best serve your own or your customers' needs.

Who Should Attend?

This class is designed for those people who are designing or using the system. Anyone who will be creating the network architecture, installing, setting up, programming or using a ViconNet system should consider attending. This includes:

- Installing Dealers (Technicians, System Designers, Support Personnel)
- Architects and Engineers
- End Users (IT Managers, Security Managers and Administrators, Security Operators)

Course Outline

Day 1 – The Basics of System Functionality with Hands-on ViconNet Training

- Review of the ViconNet system, its features and functions
- Hands-on training with exercises designed to help you understand the power of the system
- Demonstration of how ViconNet supports IP and hybrid systems
- Includes I-Onyx & 3rd party megapixel cameras, using maps
- Bookmarking, archiving, and exporting of video

Day 2 – Video Analytics, Macros and Power Programming: powerful macros that can run the system automatically

- Video analytics
- Alarm events handling
- IP video recording
- HD Display parameters
- Event management and system integration

Pre-requisites

Bring your own laptop with the following recommended system:

- Hardware: 2.66 GHz dual-core processor, 2 GB of RAM and 5 GB of disk space
- Operating System: Microsoft Windows XP Professional 32 or 64-bit; Microsoft Vista 32-bit; Microsoft Windows 7 Professional 32 or 64-bit (no Home Edition)
